

Data description:

Unbalanced panel comprising 63 quarters spanning from 2005_Q1 to 2019_Q3. There are 146 banks (financial conglomerates or individual banks), totaling 5377 observations.

BANKING VARIABLES		
Variable	Description	Source
CRED	Credit rate of change	IF.Data
PROV	Provision: ratio between the credit provisions and the credit portfolio.	IF.Data
NPL	Non-Performing Loans: ratio between credits in excess to 90 days past-due and credit portfolio.	SCR
COVER	Coverage Index: ratio between PROV and NPL	Computed from PROV and NPL
MAND_PROV	Mandatory Provision: ratio between the minimum provision according to the credit rating, as determined by regulation and the credit portfolio.	Cosif
ADD_PROV	Additional Provision: Provision in excess to the Mandatory Provision, divided by the credit portfolio.	Cosif
INCL	Incurred Loss: ratio between the minimum provision assigned to <u>past-due credits</u> , according to the credit rating, as determined by regulation and the credit portfolio.	Cosif
EXPL	Expected Loss: Provision in excess to the Incurred Loss, divided by the credit portfolio.	Cosif
WOFF	Write-offs: Ratio between charged-off credits and the credit portfolio	Cosif
E_RATED	Credits Rated as “E”: ratio between credits rated as “E” and the credit portfolio	SCR
F_RATED	Credits Rated as “F”: ratio between credits rated as “F” and the credit portfolio	SCR
G_RATED	Credits Rated as “G”: ratio between credits rated as “G” and the credit portfolio	SCR
H_RATED	Credits Rated as “H”: ratio between credits rated as “H” and the credit portfolio	SCR
EFGH_RATED	Credits Rated as “E”, “F”, “G” or “H”: ratio between credits rated as “E”, “F”, “G” or “H” and the credit portfolio. Alternatively, this variable can be considered as a proxy to problematic credits, avoiding NPL flaws.	SCR
AA_D_RATED	Credits Rated as “AA”, “A”, “B”, “C” ou “D”: ratio between credits rated as “AA”, “A”, “B”, “C” ou “D” and the credit portfolio.	SCR
DURATION	Duration: Number of years required to receive the contractual value of the credit.	SCR
LT_CREDIT	Long-Term Credits: Ratio between credits with maturity longer than 36 months (thus enable to stretch out the past due time) and the credit portfolio.	SCR
CCF	Credit Cash Flow: Ratio between the net cash flow generated by the credit portfolio and the credit portfolio.	Cosif
LCF	Liabilities Cash Flow: Ratio between the net cash flow generated by liabilities and total liabilities.	Cosif
CAPT	Liabilities rate of change	IF.Data
SIZE	Natural logarithm of total assets	IF.Data
SPREAD	Credit Spread	Cosif
ROE	Return on Equity	Cosif
ROA	Return on Assets	Cosif
CAR	Capital Adequacy Ratio: Basel Index	Cosif
ZSCORE	$(ROA + CAR)/SD(ROA)$	Cosif
LEV	Leverage: Ratio between Equities and Total Assets	IF.Data

LIQ	Liquidity Index	IF.Data
SERV2	Services Revenue to Total Revenue ratio	IF.Data
LCR	Liquidity Coverage Ratio	IF.Data
NSFR	Net Stable Funding Ratio	IF.Data
EFIC	Services Revenue to Administrative Expenses ratio	IF.Data
MACRO VARIABLES		
USD	The rate of change of Reais-Dollars rate of exchange	SGS (series 3695)
CPI	Inflation rate as measured by the IPCA, index considered as reference to inflation targeting	SGS (series 433)
IR	The rate of change of Selic Interest Rate	SGS (series 4390)
CGDP	Credit to GDP ratio	SGS (20622)
C_GAP	Credit gap according to BCBS instructions; measure used as reference to determine to countercyclical buffer	Computed from CGDP
O_GAP1	Output gap computed after the Hodrick-Prescott filter	Computed from SGS (series 4382)
O_GAP2	Output gap computed after Hamilton (2018)	Computed
CDS_5	Brazilian 5-year CDS (USD)	Bloomberg
DUMMIES		
PRIVATE_OWNED	Privately-owned banks or foreign banks, 1; 0 otherwise	IF.Data
STATE_OWNED	State-owned domestic banks, 1; 0 otherwise	IF.Data
LOCAL	Domestic banks, 1; 0 otherwise	IF.Data
FOREIGN	Foreign banks, 1; 0 otherwise	IF.Data
PUBLIC	Banks traded in B3, 1; 0 otherwise	IF.Data
NON_PUBLIC	Banks not traded in B3, 1; 0 otherwise	IF.Data
